

Nail-Proof WoodBeaver

MATERIAL RECOMMENDATIONS

Hard Wood	●	Very suitable ●
Soft Wood	●	
Nail-Embedded Wood	●	Suitable ●
Veneered Chipboard	●	
Plywood	●	
Chipboard	●	

USER INSTRUCTIONS

- Up to 25mm diameter can be used within an impact driver.
- When encountering a metal object, if possible reposition the drilled hole. Continued drilling with the Nail-Proof WoodBeaver will reduce its working life.
- When being used in a cordless drill, the larger WoodBeavers should be used on the slowest speed range setting. The slowest speed range gives the higher torque required. Using on higher speeds only provides a low torque which could stall the machine out.

32mm WoodBeavers have min. chuck requirement of 13mm

Use in a portable drilling machine

Use in a fixed drilling machine

When used with relevant adaptor

Up to 25mm only

1/4" shank (except 32mm WoodBeavers)

7/16" shank (32mm WoodBeaver only)

M6x6 (7/16" adaptor grubscrews)

7/16" adaptor grubscrews

Wear eye protection

Wear hearing protection

Wear a face mask

Wear hand protection
